AMENDMENTS TO THE CLAIMS

1. (Currently Amended) An electronic device, comprising:

a body comprising a seat;

a display unit disposed on the body; and

an index unit having a connecting end coupled to the seat of the body, a first index port and a second index port, moving between a first mode to expose the first index port and a second mode to expose the second index port, wherein the connecting end of the index unit is limited by the seat of the body when the index unit is moved between the first mode and the second mode.
2. (Original) The electronic device as claimed in claim 1, wherein the index unit is electronically connected to the display unit.
3. (Original) The electronic device as claimed in claim 1, wherein the first index port or second index port is electronically connected to the display unit.
4. (Original) The electronic device as claimed in claim 1, wherein the body comprises a seat for receiving the index unit.
5. (Original) The electronic device as claimed in claim 1, wherein the body comprises a first panel and a second panel, and the display unit is disposed on the first panel and the second panel.

Application No. 10/644,993
Amendment dated September 8, 2006
Reply to Office Action of June 8, 2006

Docket No.: 0941-0815P

6. (Original) The electronic device as claimed in claim 1, wherein the display unit is a liquid crystal display.

7 (Currently amended) An electronic device, comprising:
a first element comprising a seat;
a second element coupled to the first element with at least one degree of freedom; and
an index unit comprising a connecting end coupled to the seat of the first element with at least two degree of freedom, wherein the connecting end of the index unit is limited by the seat of the first element when the index unit is moved with respect to the first element.

8. (Original) The electronic device as claimed in claim 7 further comprising a display unit disposed on the second element.

9. (Original) The electronic device as claimed in claim 8, wherein an index unit has a first index port and a second index port, and the first index port or second index port is electronically connected to the display unit.

10. (Original) The electronic device as claimed in claim 8, wherein the display unit is a liquid crystal display.

Application No. 10/644,993
Amendment dated September 8, 2006
Reply to Office Action of June 8, 2006

Docket No.: 0941-0815P

11. (Original) The electronic device as claimed in claim 7, wherein the index unit has a first index port and a second index port, and the first index port or second index port is electronically connected to the display unit..

12. (Original) The electronic device as claimed in claim 7, wherein the first element comprises a seat for receiving the index unit.

13. (Original) The electronic device as claimed in claim 7, wherein the second element comprises a first panel and a second panel, on which the display unit is disposed.

14. (Currently Amended) An electronic device, comprising:
a first element comprising a seat;
a second element coupled to the first element along a first axis;
a display unit disposed on the second element;
an intermediate element limitedly disposed on the seat of the first element and rotated
along a second axis, wherein the second axis is not the same as the first axis; and
an index unit disposed on the intermediate element.

15. (Original) The electronic device as claimed in claim 14, wherein the index unit is coupled to the intermediate element along a third axis.

Application No. 10/644,993
Amendment dated September 8, 2006
Reply to Office Action of June 8, 2006

Docket No.: 0941-0815P

16. (Original) The electronic device as claimed in claim 15, wherein the third axis is substantially perpendicular to the second axis.

17. (Original) The electronic device as claimed in claim 14, wherein an index unit has a first index port and a second index port, and the first index port or second index port is electronically connected to the display unit.

18. (Original) The electronic device as claimed in claim 14, wherein the first element comprises a seat for receiving the index unit.

19. (Original) The electronic device as claimed in claim 14, wherein the second element comprises a first panel and a second panel, on which the display unit is disposed.

20. (Original) The electronic device as claimed in claim 14, wherein the display unit is a liquid crystal display.

21. (New) The electronic device as claimed in claim 1, wherein the connecting end of the index unit does not slide with respect to the body when the index unit is moved between the first mode and the second mode.

Application No. 10/644,993
Amendment dated September 8, 2006
Reply to Office Action of June 8, 2006

Docket No.: 0941-0815P

22. (New) The electronic device as claimed in claim 7, wherein the connecting end of the index unit does not slide with respect to the first element when the index unit is moved with the at least two degree of freedom.

23. (New) The electronic device as claimed in claim 14, wherein the connecting end of the index unit does not slide with respect to the first element when the intermediate element is rotated along the second axis.
